PROJECT IDEA REFRESHER

ONLINE PLANNER

ONLINE PLANNER

WHY	WHO	WHAT
We want to help students to succeed in their classes and relieve school related stress.	Our main target is students. However, we feel like anyone can use it.	Our solution is to provide students with an easy-to-use planner to help them maintain their hectic schedules.

PROJECT PLAN

ONLINE PLANNER

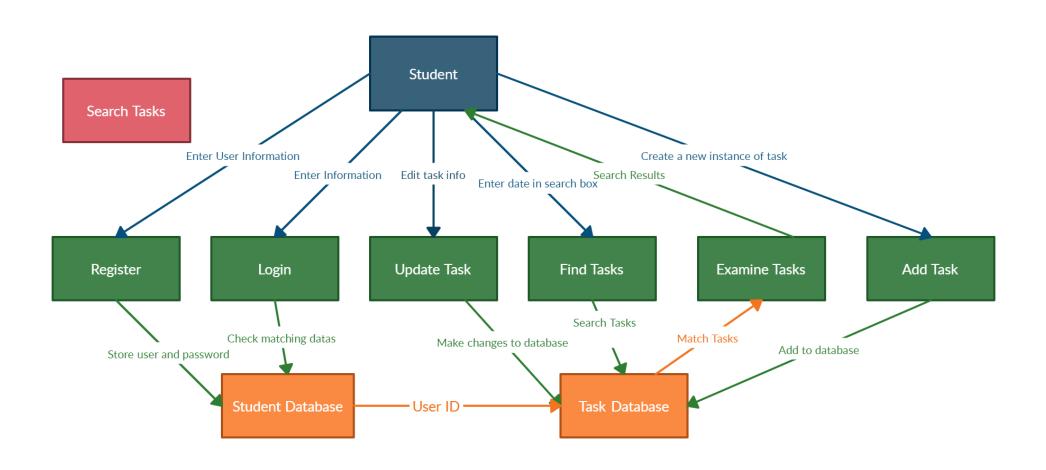

PROJECT ROLES AND RESPONSIBILTIES					
Project Name	Online Student Planner				
Name	Role	Responsibilities			
Kristoffersen Garces	Developer, Project team member	Responsible for contributing to overall project objectives and specific team deliverables Documentation Attend meetings Creating presentation slides			
Adhanna Hiyas	Developer, Project team member	Responsible for contributing to overall project objectives and specific team deliverables Attend meetings Documentation			
Khelan Natha	Developer, Project member	Responsible for contributing to overall project objectives and specific team deliverables Attend Meetings Documentation			
Timothy Maciag	Project Sponsor	Supervises the overall progress of the project Provides feedback on deliverables for each activities Host team scrum meetings Approval of project and its deliverables

Calendar

Achievements

- A simple working online planner
- Improvements
- Login and user data security
- Incorporating a calendar

TEAM REFLECTION

How did you feel about this project? Do you think your team was successful, or? What did you like about the project? What did you dislike about the project?

I think we did alright having some specific team constraints.

What did your team feel most proud of throughout the entire project experience?

Even though we are inexperienced in coding for websites and other team constraints, we were able to construct a functional project.

What did you learn about yourself as you collaborated and worked on this project (individually and as a team) Envisioned ideas are a lot harder to do.

Collaborating remotely.

How will you use (or not use) what you have learned/experienced in this project going forward?

Constantly updating and checking team member's progress to make sure everyone is up to date.

Documentations

What "stuff & things" related to this project would you like more help with?

Coding

THANK YOU FOR LISTENING!
